SciLab  Veterans Programs  Monrovia Reads Van  Literacy Fundraiser
2018

Goal activities starting this year, include:

- Library Park Redesign
- CENIC Broadband Access
- Monrovia Reads Van Launch
- Programming & Plan Template
- Space Reorganization
- Library Operating Hours Review
- Public Relations Team & Library Marketing Plan

Where We Are Now
Progress we’re making in 2018:

The continued Makerspace workshops and our new Innovation Station Grant partnership with Oak Crest has lead to 23.6% of our youth programs having a 21st Century Skills emphasis, surpassing the original goal of 20% by 2021 (Experiences, Goal 6)

The launch of the Monrovia Reads Van has led to expanded services to South Monrovia, increased mobility of library services, and has strengthened our partnership with the school district (Access, Goals 2 & 3) (Partnerships, Goal 2)

The new CENIC Broadband Network is set to launch in mid-May 2018 and make the internet speed and wifi 10x faster than it is currently (Technology, Goal 1)

Our Social Media Team has posted 47 promos for our online resources, leading to an increase in use for TumbleBooks, Overdrive, and Zinio/RB Digital (Technology, Goal 4)

The library partnered with Healing Connections to host two March 4 Balance programs for a total of 48 teens and their families (Image, Goal 3)

Supervisors worked with Staff to craft individual evaluation goals that align with and support the Strategic Plan (Staff Development, Goal 1)

What's Next
Projects coming up in 2019:

The City is working on a Library Park redesign that will provide additional open space for library users (Experiences, Goal 5)

Assess staffing levels and review library operating hours to meet community needs (Access, Goal 1)

Staff is working with the Monrovia Legacy Project Team to launch a searchable online historical resource (Partnerships, Goal 3)
